

SERVING THE ENTIRE FAMILY

Bair has partnered with the UK and DCBS to provide comprehensive reunification and support services for children in kinship care along with their kinship caregivers and biological parents. Utilizing a trauma-responsive understanding of multi-generational experiences, the Kindred Roots Program builds parenting capacity and skills for the kinship caregivers and biological parents. The evidence-based practices assist families in successfully completing their case plans and preparing for successful futures.

Kindred Roots Program Services

Kinship Supports Include:

- Family Reunification
- Family Aftercare
- Supervised Visitation
- Fatherhood Engagement
- Resource Coordination
